

Y28 Four-Column Double-Movement Hydraulic Press Machine

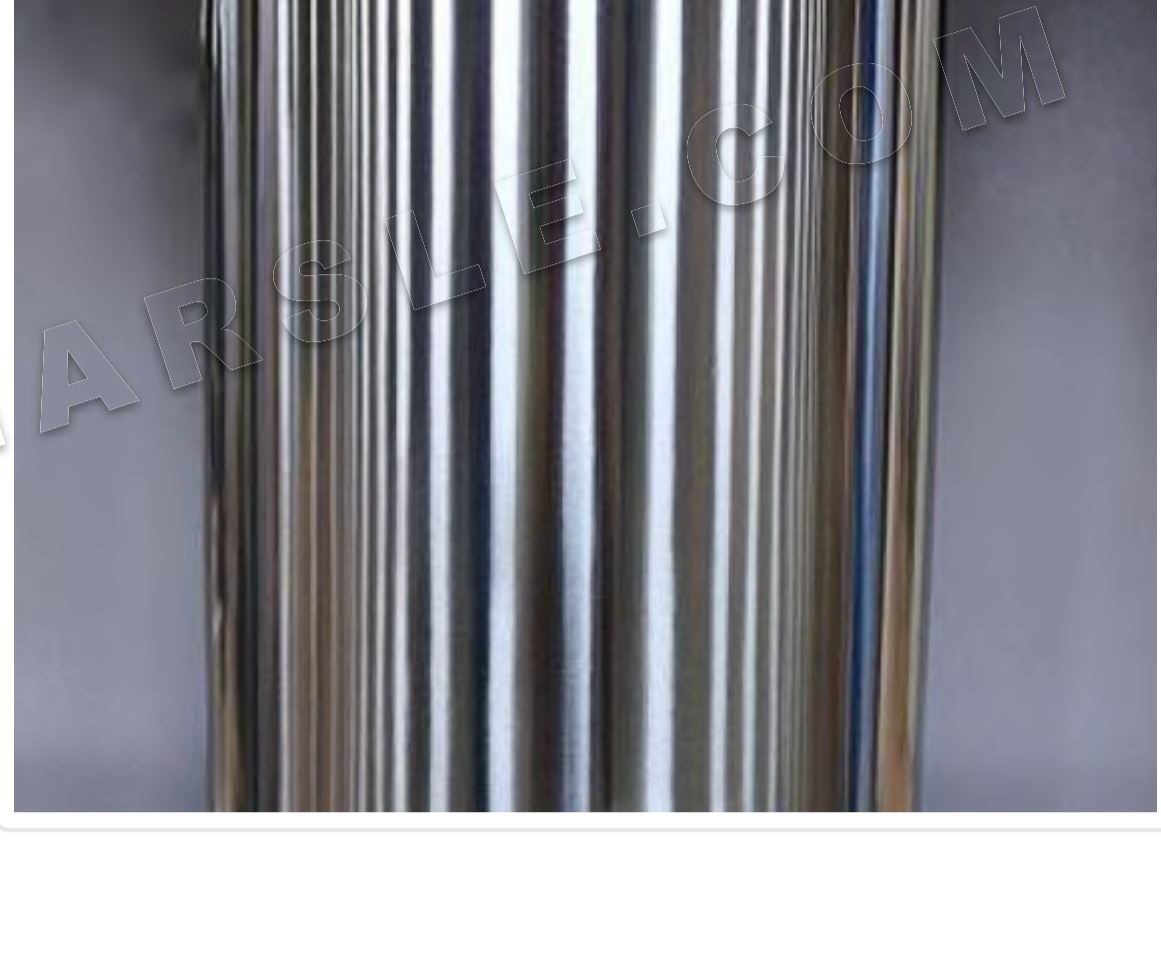

The hydraulic press of this series is the double-movement hydraulic press for sheet metal drawing. It is particularly fit for drawing, forming, flanging, bending and stamping of sheet metals for making parts and components. It is also fit for stamping process and pressing process.

CYLINDER

MAIN FUNCTIONS

Polished and chromed with high rigidity treatment.

MAIN MOTOR

MAIN FUNCTIONS

Siemens brand from Germany.

PRESSURE GAUGE

MAIN FUNCTIONS

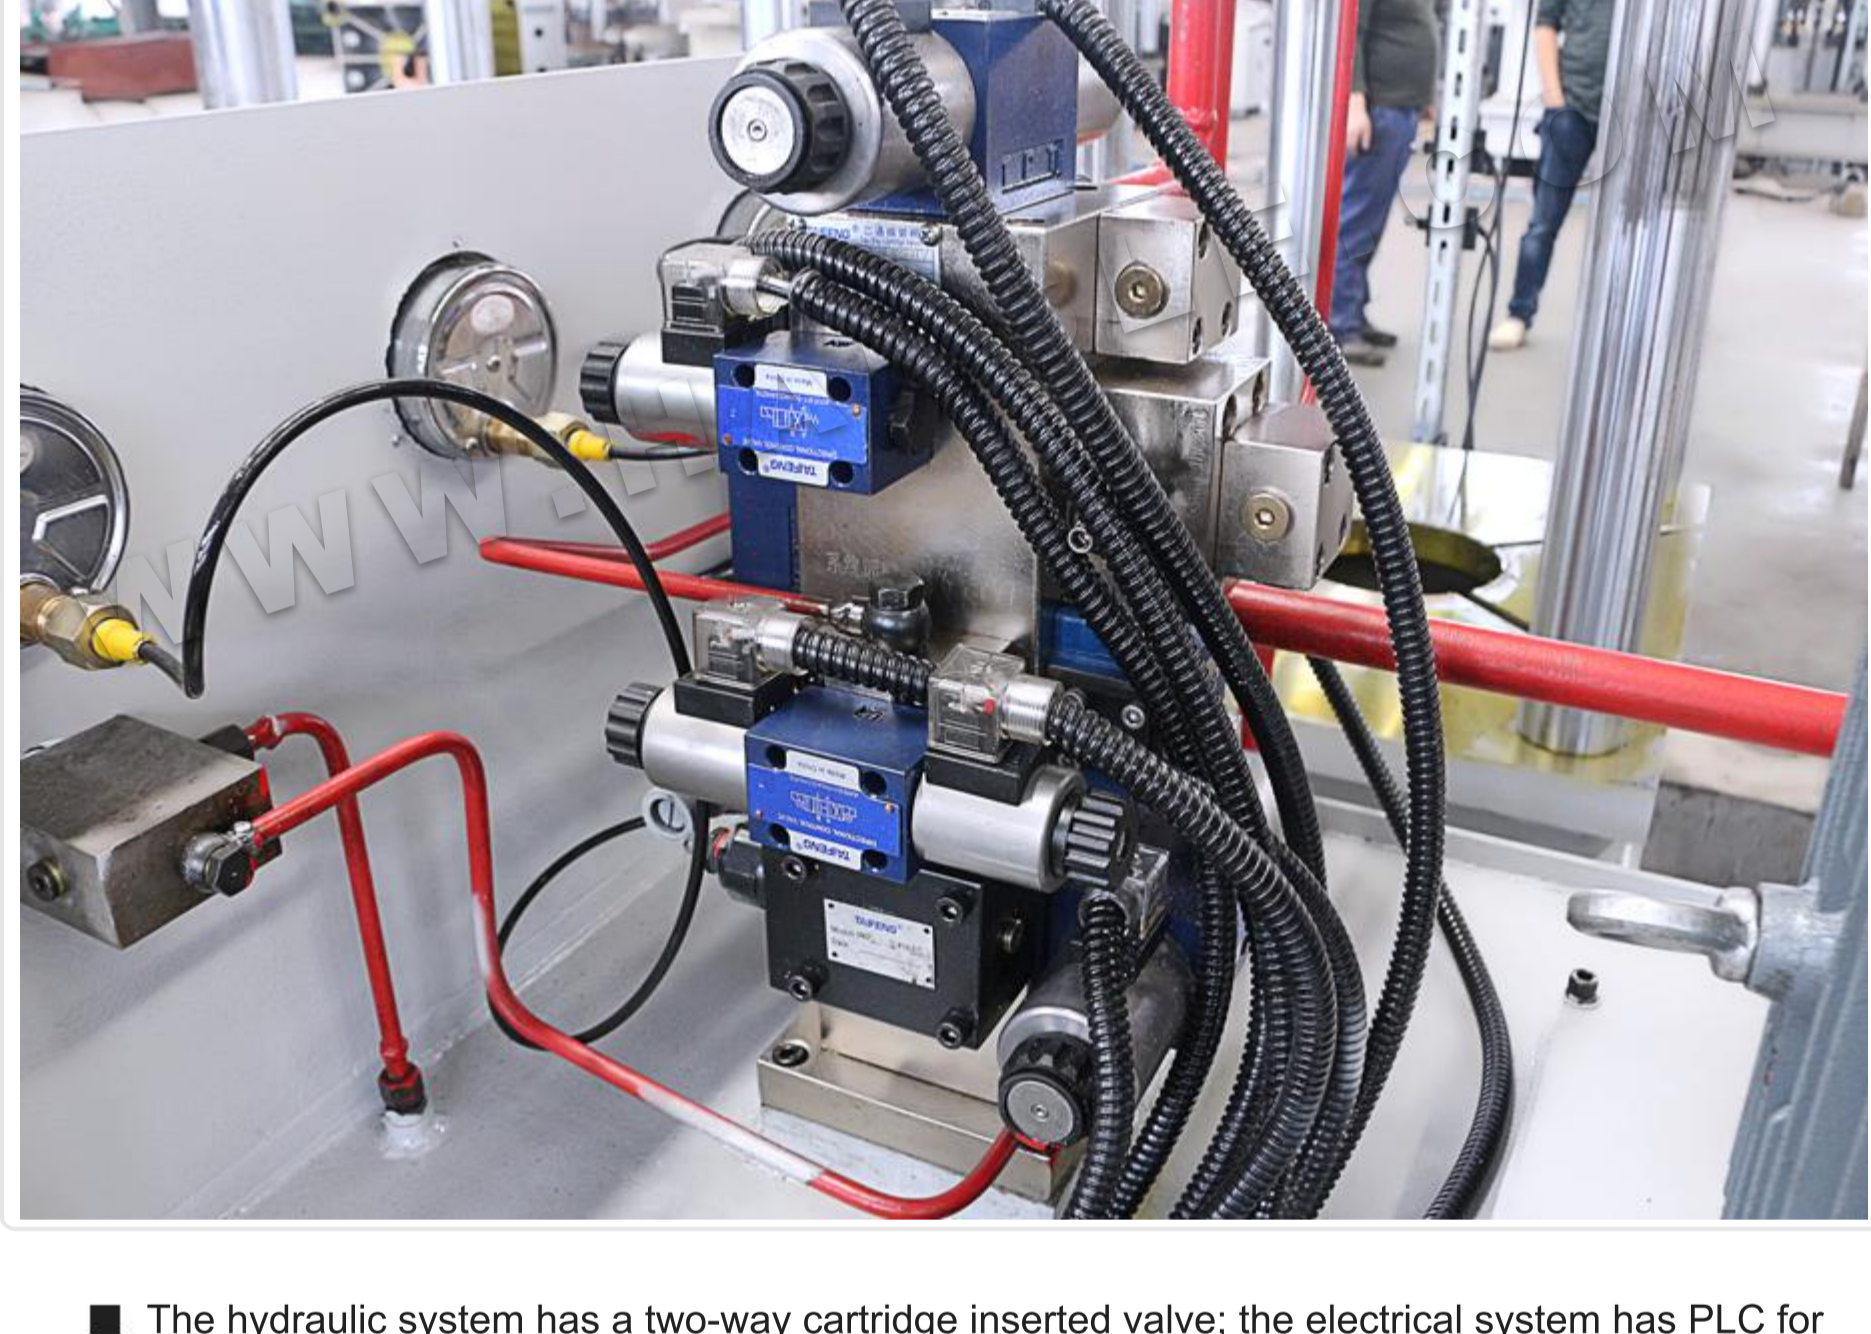

Detect main cylinder and ejection cylinder pressure, adjust system hydraulic pressure.

HYDRAULIC VALVE

MAIN FUNCTIONS

The hydraulic system has a two-way cartridge inserted valve; the electrical system has PLC for control. Thus, the machine can be conveniently operated.

HYDRAULIC OIL TANK

MAIN FUNCTIONS

Clean the oil tank regularly easily thanks to the dismantlable design

STEEL OIL TUBE

MAIN FUNCTIONS

Esthetic appearance and reduce the possibility of oil leakage.

ELECTRIC PARTS

MAIN FUNCTIONS

Schneider brand from France
